Facies

Carbonate Sedimentology and Paleoecology

Editor-in-Chief: M. Tucker; W. Kiessling; A. Munnecke

- ▶ Presents papers on interpretation of ancient and modern biotopes and carbonate depositional environments using facies analysis
- ▶ Facies analysis integrates modern and ancient biogeological processes of a changing earth
- ▶ Emphasizes paleobiology and -ecology, basin evolution, sedimentology and more
- ▶ 100% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

The journal *Facies* presents papers dealing with the interpretation of ancient and modern biotopes and carbonate depositional environments by means of facies analysis in its broadest sense. Once the central part of research in hydrocarbon exploration, facies analysis integrates modern and ancient biogeological processes of a changing earth. Special emphasis is placed on paleobiology and -ecology, basin evolution, sedimentology including diagenesis and geochemistry, as well as studies emphasizing the impact of life on earth history.

Impact Factor: 1.367 (2017), Journal Citation Reports®
