Gynecological Surgery
Editor-in-Chief: J. Deprest

▶ Official Journal of the European Society for Gynecological Endoscopy, the British Society for Gynecological Endoscopy and Arbeitsgemeinschaft Gynecologische Endoskopie
▶ Presents the surgical aspects of endoscopic imaging, and allied techniques
▶ An international forum for description and discussion of interventional endoscopy and ultrasound as elements of surgical practice
▶ Serves the international gynecological community through the transfer of information relating to practice, theory, and research

Scope

"Gynecological Surgery", founded in 2004, is the first and premier peer-reviewed scientific journal dedicated to all aspects of research, development, and training in gynecological surgery. This field is rapidly changing in response to new developments and innovations in endoscopy, robotics, imaging and other interventional procedures. Gynecological surgery is also expanding and now encompasses all surgical interventions pertaining to women’s health, including oncology, urogynecology and fetal surgery.

The Journal publishes Original Research, Reviews, Evidence-based Viewpoints on clinical protocols and procedures, Editorials, Perspectives, Communications and Case Reports. All articles, except Editorials, are subjected to peer-review. Submissions of images and video clips as supplementary files are also encouraged.

The Journal further provides a forum for education and discussions on broader issues, such as training in minimally invasive surgical technologies. We therefore consider reports and comments on teaching and training programs in surgery with relevance to women’s health.

Giving authors in their area of expertise the opportunity to publish open access
▶ High visibility thanks to unrestricted online access
▶ Rigorous peer-review and high-quality author services
▶ Creative Commons licensed – authors retain copyright
▶ Citation tracking and inclusion in bibliographic databases
▶ Easy compliance with open access mandates
