Apoptosis is an international peer-reviewed journal devoted to the rapid publication of innovative basic and clinically-oriented investigations into programmed cell death. It aims to stimulate research on the basis of mechanisms of apoptosis and on its role in various human disease processes including: cancer, autoimmune disease, viral infection, AIDS, cardiovascular disease, neurodegenerative disorders, osteoporosis and ageing. The editors intend to encourage the development of clinical therapies against apoptosis-related diseases.

Impact Factor: 3.833 (2016), Journal Citation Reports®
