Biomedical Engineering

Editor-in-Chief: S.V. Selishchev

- Reports on progress in the growing field of biomedical technology, instrumentation, and administration
- Covers development of medical technology; new engineering methods; hospitals and patient care; and biomedical information storage and retrieval
- 92% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Biomedical Engineering covers recent advances in the growing field of biomedical technology, instrumentation, and administration. Contributions focus on theoretical and practical problems associated with:

- the development of medical technology;
- the introduction of new engineering methods into public health;
- hospitals and patient care;
- the improvement of diagnosis and therapy;
- biomedical information storage and retrieval.

Biomedical Engineering is a translation of the peer-reviewed Russian journal Meditsinskaya Tekhnika. The Russian volume-year is published in English beginning in July.

Russian language information on Meditsinskaya Tekhnika is available at the following link: http://www.mtjournal.ru/
