Cancer Causes & Control

An International Journal of Studies of Cancer in Human Populations

Editor-in-Chief: I. De Vivo

- Both reports and stimulates new avenues of investigation into the causes, control, and subsequent prevention of cancer
- Draws together information published in a diverse range of journals
- Provides significant information for government agencies concerned with cancer research, control and policy
- 100% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Please note, we are currently updating the 2018 Journal Metrics.

*Cancer Causes & Control* is an international refereed journal that both reports and stimulates new avenues of investigation into the causes, control, and subsequent prevention of cancer. Its multidisciplinary and multinational approach draws together information published in a diverse range of journals.

Coverage extends to variation in cancer distribution within and between populations; factors associated with cancer risk; preventive and therapeutic interventions on a population scale; economic, demographic, and health-policy implications of cancer; and related methodological issues.

*Cancer Causes & Control* publishes original articles, reviews, short communications, commentaries, opinions, and letters to the editor which have direct relevance to researchers and practitioners working in epidemiology, medical statistics, cancer biology, health education, medical economics and related fields. The journal also provides significant information for government agencies concerned with cancer research, control and policy.

Impact Factor: 2.300 (2018), Journal Citation Reports*
