## Clinical Child and Family Psychology Review

Editors-in-Chief: Th.H. Ollendick; R.J. Prinz

- ▶ Covers the science and application of psychology as it pertains to infants, children, adolescents, and families
- ▶ Covers a wide range of relevant disciplines
- ▶ Presents original research reviews, papers and related work
- ▶ All manuscript submissions are by invitation only

Clinical Child and Family Psychology Review is a quarterly, peer-reviewed journal that provides an international, interdisciplinary forum for new developments and in-depth reviews on current thought and practices. The Journal publishes original research reviews, conceptual and theoretical papers, and related work in the broad area of the behavioral sciences that pertains to infants, children, adolescents, and families. Contributions originate from a wide array of disciplines, among them psychology (clinical, community, developmental, family, school), medicine (family practice, pediatrics, psychiatry), public health, social work, and education. Coverage includes both science and application, and extends to etiology, assessment, description, treatment and intervention, prevention, methodology, and public policy.

Impact Factor: 3.558 (2018), Journal Citation Reports®
