## Conservation Genetics

Editor: A.R. Hoelzel

- ▶ Provides a forum for data and ideas, aiding the further development of conservation genetics
- ▶ Topics include population genetics, molecular ecology and biology, evolutionary biology, and systematics and more
- ▶ Offers full research papers, review papers, short communications, and methodological notes
- ▶ Widely indexed and abstracted
- ▶ 96% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

*Conservation Genetics* promotes the conservation of biodiversity by providing a forum for data and ideas, aiding the further development of this area of study. Contributions include work from the disciplines of population genetics, molecular ecology, molecular biology, evolutionary biology, systematics, forensics, and others. The focus is on genetic and evolutionary applications to problems of conservation, reflecting the diversity of concerns relevant to conservation biology. Studies are based on up-to-date technologies, including genomic methodologies. The journal publishes original research papers, short communications, review papers and perspectives.

Impact Factor: 2.025 (2017), Journal Citation Reports®
