Documenta Ophthalmologica

Editor-in-Chief: P. Lachapelle

- Official publication of the International Society for Clinical Electrophysiology of Vision
- Promotes the understanding and application of clinical electrophysiology of vision
- Informs about basic and clinical sciences related to visual electrodiagnosis and means to improve diagnosis and clinical management of patients
- 92% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Documenta Ophthalmologica is an official publication of the International Society for Clinical Electrophysiology of Vision. The purpose of the journal is to promote the understanding and application of clinical electrophysiology of vision. Documenta Ophthalmologica will publish reviews, research articles, technical notes, brief reports and case studies which inform the readers about basic and clinical sciences related to visual electrodiagnosis and means to improve diagnosis and clinical management of patients using visual electrophysiology. Studies may involve animals or humans. In either case appropriate care must be taken to follow the Declaration of Helsinki for human subject or appropriate humane standards of animal care (e.g., the ARVO standards on Animal Care and Use).

Impact Factor: 2.362 (2017), Journal Citation Reports®
