Environmental Biology of Fishes
Editor-in-Chief: D.L.G. Noakes

► Publishes original studies on the ecology, life history, epigenetics, behavior, physiology, morphology and evolution of marine and freshwater fishes
► Deals with the relationship between fishes and their external and internal environment
► Presents editorials, papers, brief communications, essays, critical book reviews, and more

*Environmental Biology of Fishes* is an international journal that publishes original studies on the ecology, life history, epigenetics, behavior, physiology, morphology, systematics and evolution of marine and freshwater fishes. Empirical and theoretical papers are published that deal with the relationship between fishes and their external and internal environment, whether natural or unnatural. The journal concentrates on papers that advance the scholarly understanding of life and draw on a variety of disciplines in reaching this understanding.

*Environmental Biology of Fishes* publishes original papers, review papers, brief communications, editorials, book reviews and special issues. Please see the tab *Article Types* in the journal's *Instructions for Authors* for more details and submission requirements. There are no page charges to publish in this journal.

Impact Factor: 1.514 (2017), Journal Citation Reports®
