Educational Research for Policy and Practice

Editor-in-Chief: O.-S. Tan

- ▶ The official journal of the Asia-Pacific Educational Research Association.
- ▶ Publishes high-quality research that addresses key issues in educational policy and practice.
- ▶ Presents research that has generated a substantive result of importance for educational policy and practice.
- ▶ Offers analyses of global forces, regional trends and national educational reforms.
- ▶ Contains studies of key issues in teaching, learning and development.

The official journal of the Asia-Pacific Educational Research Association. Presents research that has generated a substantive result of importance for educational policy and practice; analyses of global forces, regional trends and national educational reforms; studies of key issues in teaching, learning and development - such as the challenges to be faced in learning to live together in what is the largest and most diverse region of the world.

With a broad coverage of education in all sectors and levels of education, the journal seeks to promote the contribution of educational research, both quantitative and qualitative, to system-wide reforms and policy making on the one hand, and to resolving specific problems facing teachers and learners at a particular level of education in the Asia-Pacific region on the other.
