Human Ecology

An Interdisciplinary Journal

Editor: D.G. Bates

- ▶ Studies the interactions between people and their environment
- ▶ Examines social, cultural, and psychological factors in the maintenance of ecosystems
- ▶ Investigates the effects of population density on health, social organization, and environmental quality
- ▶ Addresses adaptive problems in urban environments and the interrelationship between technological and environmental changes

Human Ecology: An Interdisciplinary Journal publishes papers probing the complex and varied systems of interaction between people and their environment.

Contributions examine the roles of social, cultural, and psychological factors in the maintenance or disruption of ecosystems and investigate the effects of population density on health, social organization, and environmental quality.

Articles also address adaptive problems in urban environments and the interrelationship between technological and environmental changes.

Impact Factor: 1.642 (2017), Journal Citation Reports®
