International Ophthalmology

The International Journal of Clinical Ophthalmology and Visual Sciences
Editor-in-Chief: P. Neri

- Provides the clinician with articles on all the relevant subspecialties of ophthalmology
- Broad international scope
- Regular sections devoted to geographical ophthalmology, and to new developments, products and techniques

International Ophthalmology provides the clinician with articles on all the relevant subspecialties of ophthalmology, with a broad international scope. The emphasis is on presentation of the latest clinical research in the field. In addition, the journal includes regular sections devoted to new developments in technologies, products, and techniques.

International Ophthalmology seeks very high quality research papers with a significant medical and social impact. These papers may relate to innovative diagnostic techniques, advances in therapy, or significant findings in relevant diseases.

International Ophthalmology also welcomes high-quality review articles, meta-analyses, and large cohort studies.

International Ophthalmology accordingly accepts the article categories Original Article and Review, acceptance being based on provision of outstanding quality for readers. In addition, Short Communications and Letters to the Editor are invited.

In summary, International Ophthalmology is a journal that updates readers on the latest clinical research findings across the entire spectrum of ophthalmology with the goal of advancing disease management.

Impact Factor: 1.335 (2017), Journal Citation Reports®
