Journal of Computer-Aided Molecular Design
Incorporating Perspectives in Drug Discovery and Design
Editors-in-Chief: F. Gago; T.R. Stouch; R. Lewis

➤ 100% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

The Journal of Computer-Aided Molecular Design provides a form for disseminating information on both the theory and the application of computer-based methods in the analysis and design of molecules. The scope of the journal encompasses papers which report new and original research and applications in the following areas: theoretical chemistry;

computational chemistry;

computer and molecular graphics;

molecular modeling;

protein engineering;

drug design;

expert systems;

general structure-property relationships;

molecular dynamics;

chemical database development and usage.

Contributions on computer-aided molecular modeling studies in pharmaceutical, polymer, materials and surface sciences, as well as other molecular-based disciplines, are particularly welcome.

As of Volume 15, a number of issues per volume will be dedicated to Perspectives in Drug Discovery and Design and from time to time overviews will be included in `regular' JCAMD issues.

Impact Factor: 2.356 (2017), Journal Citation Reports®
