Covers bioenergetics, membranes, and transport
Topics include oxidative phosphorylation, photosynthesis, muscle contraction, and biomembranes
Useful to biophysicists, membrane biologists, cell biologists, biochemists, molecular biologists, physiologists, endocrinologists, and bio-organic chemists
94% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

The Journal of Bioenergetics and Biomembranes has a new Editor in Chief, Daniel M. Raben who assumed his new position on January 1, 2013. Dr. Raben is now joined by four new Associate Editors and an updated and expanded Editorial Board. This team is dedicated to growing and expanding JOB to meet the research needs of its expanding audience.

The Journal of Bioenergetics and Biomembranes is an international journal devoted to the publication of original research that contributes to fundamental knowledge in the areas of bioenergetics, membranes, and transport, including oxidative phosphorylation, photosynthesis, muscle contraction, and biomembranes. The timely research in this international journal benefits biophysicists, membrane biologists, cell biologists, biochemists, molecular biologists, physiologists, endocrinologists, and bio-organic chemists.

Impact Factor: 2.576 (2016), Journal Citation Reports®
