Journal of Clinical Monitoring and Computing
Editor-in-Chief: S.E. Rees

- Dedicated to the exchange of knowledge and clinical information on clinical monitoring
- Includes evaluations of equipment, instrumentation and technology
- 92% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

The Journal of Clinical Monitoring and Computing is a clinical journal publishing papers related to technology in the fields of anaesthesia, intensive care medicine, emergency medicine, and peri-operative medicine.

The journal has links with numerous specialist societies, including editorial board representatives from the European Society for Computing and Technology in Anaesthesia and Intensive Care (ESCTAIC), the Society for Technology in Anesthesia (STA), the Society for Complex Acute Illness (SCAI) and the NAVAt (NAVigating towards your Anaesthesia Targets) group.

The journal publishes original papers, narrative and systematic reviews, technological notes, letters to the editor, editorial or commentary papers, and policy statements or guidelines from national or international societies. The journal encourages debate on published papers and technology, including letters commenting on previous publications or technological concerns. The journal occasionally publishes special issues with technological or clinical themes, or reports and abstracts from scientific meetings. Special issues proposals should be sent to the Editor-in-Chief. Specific details of types of papers, and the clinical and technological content of papers considered within scope can be found in instructions for authors.

Impact Factor: 2.450 (2017), Journal Citation Reports®
