Journal of Happiness Studies
An Interdisciplinary Forum on Subjective Well-Being
Editor-in-Chief: A. Delle Fave

▶ An interdisciplinary journal devoted to the scientific understanding of subjective well-being
▶ Examines both cognitive evaluations of life and affective enjoyment of life
▶ Addresses the conceptualization, measurement, prevalence, explanation, evaluation, imagination and study of happiness
▶ Spans a broad range of disciplines
▶ 92% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

The peer-reviewed Journal of Happiness Studies is devoted to scientific understanding of subjective well-being. Coverage includes both cognitive evaluations of life such as life-satisfaction, and affective enjoyment of life, such as mood level. In addition to contributions on appraisal of life-as-a-whole, the journal accepts papers on such life domains as job-satisfaction, and such life-aspects as the perceived meaning of life.

The Journal of Happiness Studies provides a forum for two main traditions in happiness research: 1) speculative reflection on the good life, and 2) empirical investigation of subjective well-being. Contributions span a broad range of disciplines: alpha-sciences, philosophy in particular; beta-sciences, especially investigations about the biological and physiological correlates of happiness and well-being; and gamma-sciences, including not only psychology and sociology but also economics.

The journal addresses the conceptualization, measurement, prevalence, explanation, evaluation, imagination and study of happiness.

Impact Factor: 1.986 (2017), Journal Citation Reports®
