SpringerBriefs in Immunology

SpringerBriefs in Immunology will present concise summaries of cutting-edge research and practical applications across a wide spectrum of basic research into immunology, with a fast turnaround time to publication. Featuring compact volumes of 50 to 125 pages, the series covers a range of content, from professional to academic. Typical topics might include, but are not limited to the following: • A timely report on state-of-the art analytical techniques • A bridge between new research results, as published in journal articles, and a contextual literature review • A snapshot of a hot or emerging topic • An in-depth case study or technical example SpringerBriefs in Immunology allows authors to present their ideas and readers to absorb them, with a minimal time investment. Both solicited and unsolicited manuscripts are considered for publication in this series.
