## Earth, Moon, and Planets

An International Journal of Solar System Science

Editor-in-Chief: M.S. Gudipati

- ▶ Offers original contributions on a range of topics as wide as the solar system and beyond
- ▶ Covers star and planet formation and evolution, and the evolution of solar and extra-solar planetary systems
- ▶ Reports on physical and chemical properties of the constituent materials, including chaotic behavior

Earth, Moon, and Planets: An International Journal of Solar System Science, publishes original contributions on subjects ranging from star and planet formation and the origin and evolution of the solar and extra-solar planetary systems, to asteroids, comets, meteoroids and near-Earth objects, including the terrestrial impact hazard and solar system - terrestrial relationships, and related topics. Coverage is concerned with the physical and chemical properties of the material constitution of these bodies, including chaotic behavior. The journal also publishes special issues on topics of relevance and conference proceedings, review articles on problems of current interest, and book reviews. The editor welcomes proposals from guest editors for special thematic issues.
