Mycopathologia

Editor-in-Chief: V. Chaturvedi

- ▶ **International journal founded in 1938**
- ▶ **Covers a broad range of topics of interest to medical mycologists**
- ▶ **97% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again**

Mycopathologia was founded in 1938 as an international journal devoted to the study of the role of fungi in human and animal disease. Many of the milestones discoveries in the field of medical mycology have been communicated through the pages of this journal. *Mycopathologia* covers a diverse, interdisciplinary range of topics that is unique in breadth and depth. It publishes original articles highlighting important developments in the fields of medical and veterinary mycology. We also welcome papers on systematics and taxonomy of fungi involved in these fields. Timely opinion articles, mini-reviews, and other communications are usually invited at the discretion of the editorial board. Unique case reports highlighting unprecedented progress in the diagnosis and treatment of fungal infections will be considered for publication at the discretion of the editorial board.

The Editor-in-Chief is Vishnu Chaturvedi (Mycology Laboratory, Wadsworth Center, New York State Department of Health & Department of Biomedical Sciences, University of Albany School of Public Health, Albany, NY, USA) and the Executive Editors are Jean-Philippe Bouchara and Ferry Hagen.
