**Neural Processing Letters**

Editors-in-Chief: M. Verleysen; M.H. Hassoun

- ▶ **An international journal publishing research results and innovative ideas on all aspects of artificial neural networks**
- ▶ **Coverage includes theoretical developments, biological models, new formal modes, learning, applications, software and hardware developments, and more**
- ▶ **Promotes fast exchange of information in the community of neural network researchers and users**
- ▶ **91% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again**

Neural Processing Letters is an international journal publishing research results and innovative ideas on all aspects of artificial neural networks. Coverage includes theoretical developments, biological models, new formal modes, learning, applications, software and hardware developments, and prospective researches.

The journal promotes fast exchange of information in the community of neural network researchers and users. The resurgence of interest in the field of artificial neural networks since the beginning of the 1980s is coupled to tremendous research activity in specialized or multidisciplinary groups. Research, however, is not possible without good communication between people and the exchange of information, especially in a field covering such different areas; fast communication is also a key aspect, and this is the reason for Neural Processing Letters.

Impact Factor: 2.591 (2018), Journal Citation Reports®
