Phenomenology and the Cognitive Sciences
Editor-in-Chief: S. Gallagher; D. Zahavi

➤ A forum for illuminating the intersections between phenomenology, empirical science, and analytic philosophy of mind
➤ Builds bridges between the Husserlian tradition and other disciplines
➤ Addresses recent work on the connection between empirical results in experimental science and first-person perspective

Phenomenology and the Cognitive Sciences is an international journal that offers a forum for illuminating the intersections between phenomenology, empirical science, and analytic philosophy of mind.

The journal builds bridges between continental phenomenological approaches in the Husserlian tradition and disciplines that have not always been open to or aware of phenomenological contributions to understanding cognition and related topics. The journal presents work by phenomenologists, scientists, and philosophers who study cognition. In addition the journal offers discussion of methodological issues involving the variety of approaches appropriate for addressing these problems.

Phenomenology and the Cognitive Sciences provides critical review articles that address recent work in areas relevant to the connection between empirical results in experimental science and first-person perspective.
