Plant Molecular Biology
An International Journal on Molecular Biology, Molecular Genetics and Biochemistry
Editor-in-Chief: W. Gruissem

- An international journal dedicated to rapid publication of original research in all areas of plant biology
- Coverage includes research in comparative genomics, functional genomics, proteomics, bioinformatics, computational biology, biochemical and regulatory networks, and biotechnology
- Editor-in-Chief: Wilhelm Gruissem, Institute of Plant Sciences, Swiss Federal Institute of Technology, Zurich
- 100% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Plant Molecular Biology is an international journal dedicated to rapid publication of original research in all areas of plant biology. Since its founding in 1981, it has continually ranked among the leading journals. Coverage addresses important biological problems of broad interest. Coverage includes research in comparative genomics, functional genomics, proteomics, bioinformatics, computational biology, biochemical and regulatory networks, and biotechnology. Preference is given to publication of results that provide significant new insights into biological problems and that advance the understanding of structure, function, mechanisms, or regulation.

The Editor-in-Chief is Wilhelm Gruissem, Institute of Plant Sciences, Swiss Federal Institute of Technology, Zurich.

Impact Factor: 3.356 (2016), Journal Citation Reports®
