Positivity
An International Mathematics Journal devoted to Theory and Applications of Positivity
Editor-in-Chief: B. de Pagter

▶ Presents research in all areas of analysis and its applications to other disciplines having a clear and substantive link to the general theme of positivity
▶ Illustrates applications of positivity to other disciplines, including economics, engineering, life sciences, physics and statistical decision theory
▶ 92% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

The purpose of Positivity is to provide an outlet for high quality original research in all areas of analysis and its applications to other disciplines having a clear and substantive link to the general theme of positivity. Specifically, articles that illustrate applications of positivity to other disciplines - including but not limited to - economics, engineering, life sciences, physics and statistical decision theory are welcome.

The scope of Positivity is to publish original papers in all areas of mathematics and its applications that are influenced by positivity concepts.

This includes the following areas.

Impact Factor: 0.661 (2016), Journal Citation Reports®
