Health Informatics

This series is directed to healthcare professionals leading the transformation of healthcare by using information and knowledge. For over 20 years, Health Informatics has offered a broad range of titles: some address specific professions such as nursing, medicine, and health administration; others cover special areas of practice such as trauma and radiology; still other books in the series focus on interdisciplinary issues, such as the computer based patient record, electronic health records, and networked healthcare systems. Editors and authors, eminent experts in their fields, offer their accounts of innovations in health informatics. Increasingly, these accounts go beyond hardware and software to address the role of information in influencing the transformation of healthcare delivery systems around the world. The series also increasingly focuses on the users of the information and systems: the organizational, behavioral, and societal changes that accompany the diffusion of information technology in health services environments.

Developments in healthcare delivery are constant; in recent years, bioinformatics has emerged as a new field in health informatics to support emerging and ongoing developments in molecular biology. At the same time, further evolution of the field of health informatics is reflected in the introduction of concepts at the macro or health systems delivery level with major national initiatives related to electronic health records (EHR), data standards, and public health informatics.

These changes will continue to shape health services in the twenty-first century. By making full and creative use of the technology to tame data and to transform information, Health Informatics will foster the development and use of new knowledge in healthcare.

Recently published:

A. Acharya, V. Powell, M.H. Torres-Urquidy, R.H. Posteraro, T.P. Thyvalikakath (Eds.)

Integration of Medical and Dental Care and Patient Data

R. Richesson, J. Andrews (Eds.)

Clinical Research Informatics

A. André (Ed.)

Digital Medicine

Upcoming Volumes:

K. Zheng, J. Westbrook, Th.G. Kannampallil, V.L. Patel (Eds.)

Cognitive Informatics

Reengineering Clinical Workflow for Safer and More Efficient Care

T. Adam, C. Aliferis (Eds.)

Personalized and Precision Medicine Informatics

A Workflow-Based View

E.R. Onyijekwe, J. Rokne, C.L. Hall (Eds.)
