Sensing and Imaging
Editor-in-Chief: M. Jiang; N. Ida

- Publishes theoretical and experimental papers addressing sensing and imaging techniques, systems, networks, and applications in engineering, science, and medicine
- Covers subsurface and surface sensing as well as other sensing areas
- Describes the detection, identification, and classification of objects, structures, and matter under and at surfaces

Please note, we are currently updating the 2018 Journal Metrics.

*Sensing and Imaging* publishes peer-reviewed theoretical and experimental papers addressing sensing and imaging technologies and applications in engineering and science.

The journal has a broad and multidisciplinary scope, including all varieties of sensor technology (physical, chemical, and biological), signal and image processing, sensor modelling and simulation, and all areas of application.

*Sensing and Imaging* is overseen by an international Editorial Board representing the full scope of the journal. Article types considered for publication include Regular Papers, Topical Reviews and Letters.
