Journal of Signal Processing Systems
Editor-in-Chief: S.-Y. Kung
Co-Editor-in-Chief: S.S. Bhattacharyya; J. Takala

- Investigates the design and implementation of signal processing systems, with or without VLSI circuits
- Addresses a wide range of topics within the subject areas of system design and implementation, algorithms, architectures, and applications
- Features high quality workshop, symposium, and conference papers with an emphasis on system design

The Journal of Signal Processing Systems publishes research papers on the design and implementation of signal processing systems, with or without VLSI circuits. Readers will find a wide range of topics covered within the subject areas of system design and implementation, algorithms, architectures, and applications. In addition to original, peer reviewed content, the journal features high quality workshop, symposium, and conference papers with an emphasis on system design.

Impact Factor: 1.035 (2018), Journal Citation Reports®
