## Astronomy Reports

Editor-in-Chief: D. Bisikalo

- ▶ Recognized for excellence since 1924
- ▶ Coverage includes astronomy, including theoretical and observational astrophysics, physics of the Sun, planetary astrophysics, radioastronomy, stellar astronomy, celestial mechanics, and astronomy methods and instrumentation
- ▶ Publishes chronicles and proceedings of international conferences

**Please note, we are currently updating the 2018 Journal Metrics.**

*Astronomy Reports* is an international peer reviewed journal that publishes original papers on astronomical topics, including theoretical and observational astrophysics, physics of the Sun, planetary astrophysics, radio astronomy, stellar astronomy, celestial mechanics, and astronomy methods and instrumentation.

### PEER REVIEW

*Astronomy Reports* is a peer reviewed journal. We use a single blind peer review format. Our team of reviewers includes over 100 experts from 6 countries. The average period from submission to first decision in 2018 was 30 days, and that from first decision to acceptance was 45 days. The rejection rate for submitted manuscripts in 2018 was 15%. The final decision on the acceptance of an article for publication is made by the Editorial Board.

Any invited reviewer who feels unqualified or unable to review the manuscript due to the conflict of interests should promptly notify the editors and decline the invitation. Reviewers should formulate their statements clearly in a sound and reasoned way so that authors can use reviewer's arguments to improve the manuscript. Personal criticism of the authors must be avoided. Reviewers should indicate in a review (i) any relevant published work that has not been cited by the authors, (ii) anything that has been reported in previous publications and not given appropriate reference or citation, (ii) any substantial similarity or overlap with any other manuscript (published or unpublished) of which they have personal knowledge.

Impact Factor: 1.235 (2018), Journal Citation Reports®
