Crystallography Reports

Editor-in-Chief: M.V. Koval'chuk

- ▶ Presents original papers, short communications, and reviews on wide-ranging aspects of crystallography
- ▶ Coverage includes diffraction and scattering of X-rays, electrons and neutrons; X-ray, electron, and neutron diffraction determination of crystal structure
- ▶ Also examines the methods used in these studies

Crystallography Reports (Kristallografiya), founded in 1956, publishes original papers, short communications, and reviews on different aspects of crystallography: diffraction and scattering of X-rays, electrons, and neutrons; X-ray, electron, and neutron diffraction determination of crystal structure of inorganic and organic materials, including proteins and other biological objects; optical and radiowave spectroscopy; growth, real structure and physical properties of crystals; thin films and partly disordered systems, and the methods used in these studies.

Impact Factor: 0.563 (2016), Journal Citation Reports®
