- ▶ **Timely and topical short papers, emphasizing fundamental theoretical and experimental research in all field of physics**
- ▶ **High-quality and prompt peer-review process and editorial handling**
- ▶ **First-hand reports of the current state of physics research in the former Soviet Union and other countries**

JETP Letters is an international peer reviewed journal for rapid publication of short communications describing the basic theoretical and experimental research in all fields of physics from solid state to elementary particles. The journal has 24 issues per year and welcomes manuscripts from all countries in the English or Russian language.

TOPICS COVERED

All topics of experimental and theoretical physics including gravitation, field theory, elementary particles and nuclei, plasma, nonlinear phenomena, condensed matter, superconductivity, superfluidity, lasers, and surfaces.

PEER REVIEW

JETP Letters is a peer reviewed journal. We use a single blind peer review format. Our team of reviewers includes over 60 reviewers, both internal and external (80%), from 6 countries. The average period from submission to first decision in 2017 was 10 days, and that from first decision to acceptance was 18 days. The final decision on the acceptance of an article for publication is made by the Editorial Board.

Any invited reviewer who feels unqualified or unable to review the manuscript due to the conflict of interests should promptly notify the editors and decline the invitation. Reviewers should formulate their statements clearly in a sound and reasoned way so that authors can use reviewer's arguments to improve the manuscript. Personal criticism of the authors must be avoided. Reviewers should indicate in a review (i) any relevant published work that has not been cited by the authors, (ii) anything that has been reported in previous publications and not given appropriate reference or citation, (ii) any substantial similarity or overlap with any other manuscript (published or unpublished) of which they have personal knowledge.

Impact Factor: 1.363 (2017), Journal Citation Reports®
