Thermophysics and Aeromechanics

Editor-in-Chief: S.V. Alekseenko

- ▶ Offers original reports, reviews, and discussions on hydro-gas dynamics, heat and mass transfer, turbulence, and more
- ▶ Publishes articles of both a basic and applied character
- ▶ Founded by the Siberian Branch of the Russian Academy of Sciences (SB RAS), the Kutateladze Institute of Thermophysics SB RAS, and the Khristianivich Institute of Theoretical and Applied Mechanics SB RAS

Thermophysics and Aeromechanics is a journal that offers original reports, reviews, and discussions on fluid dynamics, heat and mass transfer, turbulence, and other topics. The journal publishes articles of both a fundamental and applied character, as well as theoretical and numerical simulation, experimental data and descriptions of experimental technology and new engineering principles. Founded by the Siberian Branch of the Russian Academy of Sciences (SB RAS), Kutateladze Institute of Thermophysics SB RAS, and Khristianivich Institute of Theoretical and Applied Mechanics SB RAS in 1994, *Thermophysics and Aeromechanics*, the journal welcomes contributions in the English language from all countries. Current contributors are from Australia, Austria, Belarus, Belgium, Canada, China, Denmark, France, Germany, Great Britain, India, Iran, Italy, Japan, South Korea, the Netherlands, Pakistan, Portugal, Russia, Serbia, Sweden, Ukraine, USA, etc.

PEER REVIEW

Thermophysics and Aeromechanics is a peer reviewed journal. We use a single blind peer review format. Our team of reviewers includes over 500 reviewers, both internal and external (95%), from 14 countries. The average period from submission to first decision in 2017 was 29 days, and that from first decision to acceptance was 68 days. The final decision on the acceptance of an article for publication is made by the Editorial Board.

Any invited reviewer who feels unqualified or unable to review the manuscript due to the conflict of interests should promptly notify the editors and decline the invitation. Reviewers should formulate their statements clearly in a sound and reasoned way so that authors can use reviewer's arguments to improve the manuscript. Personal criticism of the authors must be avoided.

Impact Factor: 1.156 (2017), Journal Citation Reports®
