Thermophysics and Aeromechanics

Editor-in-Chief: S.V. Alekseenko

- ▶ Offers original reports, reviews, and discussions on hydro-gas dynamics, heat and mass transfer, turbulence, and more
- ▶ Publishes articles of both a basic and applied character
- ▶ Founded by the Siberian Branch of the Russian Academy of Sciences (SB RAS), the Kutateladze Institute of Thermophysics SB RAS, and the Khristianivich Institute of Theoretical and Applied Mechanics SB RAS

Founded in 1994, Thermophysics and Aeromechanics offers original reports, reviews, and discussions on hydro-gas dynamics, heat and mass transfer, turbulence, methods of aero- and thermo-physical experiment, physics of low-temperature plasma, and physical and technical problems of energetics. These are the fields of investigation at the Kutateladze Institute of Thermophysics SB RAS and the Khristianivich Institute of Theoretical and Applied Mechanics SB RAS. The journal promotes exchange of information between the researchers of Russia and the international scientific community.

Contributors to Thermophysics and Aeromechanics represent Australia, Austria, Belgium, Canada, China, Denmark, France, Germany, Italy, India, Japan, South Korea, the Netherlands, Portugal, Russia, Sweden, UK, USA, etc.

The journal publishes articles of both a basic and applied character, as well as theoretical and numerical simulation, experimental data and descriptions of experimental technology and new engineering principles.

Impact Factor: 0.747 (2016), Journal Citation Reports®
