Frontiers in Energy
Editors-in-Chief: S. Weng; W. Ni; S. Peng

- Addresses all aspects of energy conversion systems, power generation, transmission, and use
- Examines environmental, economic, and policy issues as well as technical development
- Highlights recent research achievements from Chinese universities
- Fosters communication and exchange among scientists in China and abroad

Frontiers in Energy, an interdisciplinary and peer-reviewed international journal launched in January 2007, seeks to provide a rapid and unique platform for reporting the most advanced research on energy technology and strategic thinking in order to promote timely communication between researchers, scientists, engineers, and policy makers in the field of energy.

Frontiers in Energy aims to be a leading peer-reviewed platform and an authoritative source of information for analyses, reviews and evaluations in energy engineering and research, with a strong focus on energy analysis, energy modelling and prediction, integrated energy systems, energy conversion and conservation, energy planning and energy on economic and policy issues.

Frontiers in Energy publishes state-of-the-art review articles, original research papers and short communications by individual researchers or research groups. It is strictly peer-reviewed and accepts only original submissions in English. The scope of the journal is broad and covers all latest focus in current energy research.

Impact Factor: 0.753 (2017), Journal Citation Reports®
