Mathematics in Computer Science

Editors-in-Chief: D. Wang; Z. Zheng

Managing Editor: I.S. Kotsireas

- ▶ Publishes peer-reviewed original research papers and invited survey articles on the development of theories and methods for computer and information sciences
- ▶ Special issues focus on topics reflecting the trends in mathematics in computer science
- ▶ Coverage includes the design, implementation, and analysis of algorithms and software tools for mathematical computation and reasoning, and the integration of mathematics and computer science for scientific and engineering applications
- ▶ 93% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Mathematics in Computer Science (MCS) publishes high-quality original research papers on the development of theories and methods for computer and information sciences, the design, implementation, and analysis of algorithms and software tools for mathematical computation and reasoning, and the integration of mathematics and computer science for scientific and engineering applications. Insightful survey articles may be submitted for publication by invitation. As one of its distinct features, the journal publishes mainly special issues on carefully selected topics, reflecting the trends of research and development in the broad area of mathematics in computer science. Submission of proposals for special issues is welcome.
