Regular and Chaotic Dynamics

Editor-in-Chief: A. Borisov

- ▶ Features original research papers in dynamical systems theory and its applications.
- ▶ Rooted in the Moscow school of mathematics and mechanics, the journal brings together dynamical problems from all the sciences.
- ▶ Combines classical problems, modern techniques and breakthroughs in the field.
- ▶ Publishes research papers, review articles, comments on previously published papers, and translations of works by influential Russian scientists of past centuries, previously unavailable in English.

Please note, we are currently updating the 2018 Journal Metrics.

Regular and Chaotic Dynamics (RCD) is an international journal publishing research papers in dynamical systems theory and its applications. Rooted in the Moscow school of mathematics and mechanics, the journal successfully combines classical problems, modern mathematical techniques and breakthroughs in the field. Regular

Regular and Chaotic Dynamics welcomes papers that establish original results, characterized by rigorous mathematical settings and proofs, and that also address practical problems. In addition to original research papers, the journal publishes review articles, historical and polemical essays, and translations of works by influential scientists of past centuries, previously unavailable in English. Along with regular issues, *Regular and Chaotic Dynamics* also publishes special issues devoted to particular topics and events in the world of dynamical systems.

Impact Factor: 0.933 (2018), Journal Citation Reports®
