Journal of Engineering Thermophysics

Editor-in-Chief: A.N. Pavlenko

- ▶ **Includes experimental works, theory, analysis and computational studies of thermophysics of engineering and the environment**

Journal of Engineering Thermophysics is an international peer reviewed journal that publishes original articles. The journal welcomes original articles on thermophysics from all countries in the English language. The journal focuses on experimental work, theory, analysis, and computational studies for better understanding of engineering and environmental aspects of thermophysics. The editorial board encourages the authors to submit papers with emphasis on new scientific aspects in experimental and visualization techniques, mathematical models of thermophysical process, energy, and environmental applications. *Journal of Engineering Thermophysics* covers all subject matter related to thermophysics, including heat and mass transfer, multiphase flow, conduction, radiation, combustion, thermo-gas dynamics, rarefied gas flow, environmental protection in power engineering, and many others.

PEER REVIEW

Journal of Engineering Thermophysics is a peer reviewed journal. We use a double blind peer review format. Our team of reviewers includes over 40 experts from 5 countries. The average period from submission to first decision in 2018 was 30 days, and that from first decision to acceptance was 90 days. The rejection rate for submitted manuscripts in 2018 was 60%. The final decision on the acceptance of an article for publication is made by the Editorial Board.

Any invited reviewer who feels unqualified or unable to review the manuscript due to the conflict of interests should promptly notify the editors and decline the invitation. Reviewers should formulate their statements clearly in a sound and reasoned way so that authors can use reviewer's arguments to improve the manuscript. Personal criticism of the authors must be avoided. Reviewers should indicate in a review (i) any relevant published work that has not been cited by the authors, (ii) anything that has been reported in previous publications and not given appropriate reference or citation, (ii) any substantial similarity or overlap with any other manuscript (published or unpublished) of which they have personal knowledge.

Impact Factor: 0.767 (2017), Journal Citation Reports®
