_Automatic Documentation and Mathematical Linguistics_ is an international peer reviewed journal that covers all aspects of automation of information processes and systems, as well as algorithms and methods for automatic language analysis. Emphasis is on the practical applications of new technologies and techniques for information analysis and processing.

**PEER REVIEW**

Automatic Documentation and Mathematical Linguistics is a peer reviewed journal. We use a single blind peer review format. Our team of reviewers includes 12 reviewers, both internal and external (50%). The average period from submission to first decision in 2017 was 30 days, and that from first decision to acceptance was 120 days. The rejection rate for submitted manuscripts in 2017 was 27%. The final decision on the acceptance of an article for publication is made by the Editor-in-Chief.

Any invited reviewer who feels unqualified or unable to review the manuscript due to the conflict of interests should promptly notify the editors and decline the invitation. Reviewers should formulate their statements clearly in a sound and reasoned way so that authors can use reviewer’s arguments to improve the manuscript. Personal criticism of the authors must be avoided. Reviewers should indicate in a review (i) any relevant published work that has not been cited by the authors, (ii) anything that has been reported in previous publications and not given appropriate reference or citation, (iii) any substantial similarity or overlap with any other manuscript (published or unpublished) of which they have personal knowledge.
