Cardiovascular Toxicology
Editor-in-Chief: Y.J. Kang

- Offers research and reviews on the molecular therapy of cardiovascular disease
- Covers detrimental effects of cardiovascular drugs, plus cardiovascular effects of other drugs
- Reports safety and toxicological data on new cardiovascular and non-cardiovascular drugs

Cardiovascular Toxicology is the only journal dedicated to publishing contemporary issues, timely reviews, and experimental and clinical data on the molecular therapy of cardiovascular disease. CT publishes papers that will elucidate the effects, molecular mechanisms, and signaling pathways of environmental toxicants on the cardiovascular system. Also covered are the detrimental effects of new cardiovascular drugs, and cardiovascular effects of non-cardiovascular drugs, anti-cancer chemotherapy, and gene therapy. In addition, Cardiovascular Toxicology reports safety and toxicological data on new cardiovascular and non-cardiovascular drugs. This is a unique journal in which these data can be scrutinized separately from efficacy.

Impact Factor: 2.989 (2017), Journal Citation Reports®
