

Rendiconti del Circolo Matematico di Palermo Series 2

Editors-in-Chief: C. Ciliberto; G. Dal Maso; P. Vetro

- ▶ **The Rendiconti del Circolo Matematico di Palermo is an international journal publishing original research papers on any subject of pure and applied mathematics**

The *Rendiconti del Circolo Matematico di Palermo* is an international journal publishing original research papers on pure and applied mathematics, focusing in particular on: **Algebra, Algebraic Geometry, Arithmetic Geometry and Number Theory, Calculus of Variations, Partial Differential Equations, Ordinary Differential Equations, Functional Analysis, Complex Analysis**, and applications of the above fields.

Submissions; since foundation of the journal, are refereed by an international editorial board of Mathematicians.

The *Rendiconti del Circolo Matematico di Palermo* is the Journal of the "*Circolo Matematico di Palermo*", a nonprofit organization, founded by Gian Battista Guccia in 1884.

The publication of this journal is in two series: The first series, published between 1885 and 1941, consists of 63 volumes, and almost all of them are still available. The second series began in 1952 and, starting with volume 57 (2008), will be published in cooperation with Springer-Verlag.
