Exposure and Health

Editor-in-Chief: A.A. Meharg

Please note, we are currently updating the 2018 Journal Metrics.

It is a multidisciplinary journal focused on global human health consequences of exposure to pollution in natural and anthropogenic influenced environments. The journal provides a unique platform for scientists in this field to exchange ideas and share information on research for the solution of health effects of exposure to environmental contaminants.

Coverage encompasses Biogeochemical sciences; Health sciences; Exposure analysis and Epidemiology; Social sciences and public policy; Mathematical, numerical and statistical methods; Experimental, data collection and data analysis methods and more.

Research topics include local, regional and global pollution, exposure and health problems; health risk analysis of pollution, methods of quantification and analysis of risk under uncertainty; biogeochemical processes in natural and anthropogenic influenced systems and health effects; analysis of pollution, exposure and health data; and more.

Impact Factor: 4.532 (2018), Journal Citation Reports®
