BMC Anesthesiology

► Rapid publication upon acceptance (average time from acceptance to publication is less than 10 days)
► Recommended by your peers (over 80% of previous authors who would recommend the journal to a colleague)
► Broad interest scope, covering clinical studies and basic pharmacological research

BMC Anesthesiology is an open access journal publishing original peer-reviewed research articles in all aspects of anesthesiology, critical care, perioperative care and pain management, including clinical and experimental research into anesthetic mechanisms, administration and efficacy, technology and monitoring, and associated economic issues.

*BMC Anesthesiology* is part of the *BMC* series which publishes subject-specific journals focused on the needs of individual research communities across all areas of biology and medicine. We do not make editorial decisions on the basis of the interest of a study or its likely impact. Studies must be scientifically valid; for research articles this includes a scientifically sound research question, the use of suitable methods and analysis, and following community-agreed standards relevant to the research field.

Specific criteria for other article types can be found in the submission guidelines.

*BMC series - open, inclusive and trusted.*
