BMC Ecology

- Broad scope includes behavioral ecology, populations, ecosystems, and theoretical models
- Annual Ecology Image Competition
- Large international readership

*BMC Ecology* is an open access journal publishing original peer-reviewed research articles in environmental, behavioral and population ecology as well as biodiversity of plants, animals, and microbes.

*BMC Ecology* is part of the BMC series which publishes subject-specific journals focused on the needs of individual research communities across all areas of biology and medicine. We do not make editorial decisions on the basis of the interest of a study or its likely impact. Studies must be scientifically valid; for research articles this includes a scientifically sound research question, the use of suitable methods and analysis, and following community-agreed standards relevant to the research field.

BMC series - open, inclusive and trusted.

Impact Factor: 2.315 (2017), Journal Citation Reports®

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
