BMC Ear, Nose and Throat Disorders

- ▶ **Broad scope: considers articles on all aspects of ENT research**
- ▶ **Efficient, fair and friendly open peer-review service**
- ▶ **Editor-in-Chief is renowned educator and researcher in the field**

BMC Ear, Nose and Throat Disorders is an open access, peer-reviewed journal that considers articles on all aspects of the prevention, diagnosis and management of ear, nose and throat disorders, as well as related molecular genetics, pathophysiology, and epidemiology.

BMC Ear, Nose and Throat Disorders is part of the *BMC* series which publishes subject-specific journals focused on the needs of individual research communities across all areas of biology and medicine. We do not make editorial decisions on the basis of the interest of a study or its likely impact. Studies must be scientifically valid; for research articles this includes a scientifically sound research question, the use of suitable methods and analysis, and following community-agreed standards relevant to the research field.

Specific criteria for other article types can be found in the submission guidelines.

BMC series - open, inclusive and trusted.

Electronic access
