Annals of Clinical Microbiology and Antimicrobials

Editors-in-Chief: H. Leblebicioglu; A. Rodriguez-Morales

- Average of 20 days to a first decision
- High author satisfaction

Annals of Clinical Microbiology and Antimicrobials is a leading open access journal for researchers to publish clinical microbiology, infectious diseases and antimicrobials. Committed to improving the management of infectious diseases, the journal accepts manuscripts that lead to improving the communication between laboratory and clinical science in the field of clinical microbiology and antimicrobial treatment.

We welcome research on a variety of topics including diagnostic or biological aspects of infectious diseases, case management and treatment, and antimicrobial development and resistance. With a rigorous peer review process and a quick time to first decision, our global editorial board will give your research the high visibility desired within your community.

Impact Factor: 2.376 (2016), Journal Citation Reports®
