Journal of Translational Medicine
Editor-in-Chief: F.M. Marincola

- Specialized sections with expert Section Editors and Editorial Boards
- Ranked in top 25% percentile of ‘Medicine, Research & Experimental’ journals in the JCR
- Widest possible global dissemination of your research, with more almost 1,5 million article downloads in 2017

One of the world's leading journals in the field of translational research, Journal of Translational Medicine is dedicated to turning fundamental discoveries in the basic and preclinical sciences into improvements in human health. We are an interdisciplinary journal covering all areas of translational research, including a number of specialised sections with their own expert Section Editors and Editorial Boards. With over 1.4 million article accesses annually, we welcome submissions from across our subject area and pride ourselves on providing swift editorial decisions.

Impact Factor: 4.197 (2017), Journal Citation Reports®
