One of the world's leading open access neuroscience journals, *Journal of Neuroinflammation* focuses on interactions of the immune system with the nervous system. We welcome submissions from across all areas of this rapidly expanding field, including research describing the functions of CNS immune mediators as well as the roles of the peripheral immune system. As the field of neuroinflammation continues to revolutionize our understanding of chronic neurological diseases, we bring together work highlighting common pathogenic processes and provide a forum for researchers to highlight advances in discovery.

Impact Factor: 5.193 (2017), Journal Citation Reports®

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
