Molecular Neurodegeneration

Editor-in-Chief: H. Xu
Editors-in-Chief: G. Bu

- Now the highest ranking open access neuroscience journal in the JCR
- Official journal of the BrightFocus Foundation
- High visibility - receives over 70,000 article accesses per month

The leading open access journal in the field of neurosciences, Molecular Neurodegeneration encompasses all aspects of neurodegeneration research at the molecular and cellular levels. Neurodegenerative diseases, which are often associated with advanced aging, have become a significant public health issue as the aging population grows larger. As the official journal of the BrightFocus Foundation, we highlight recent advances focusing on the molecular and cellular mechanisms underlying the pathogenesis of these disorders.

Impact Factor: 6.426 (2017), Journal Citation Reports®

Giving authors in their area of expertise the opportunity to publish open access
- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
