

## **SpringerBriefs in Operations Management**

Series Ed.: S.P. Sethi

SpringerBriefs present concise summaries of cutting-edge research and practical applications across a wide spectrum of fields. Featuring compact volumes of 50 to 125 pages, the series covers a range of content from professional to academic. Typical topics might include: • A timely report of state-of-the-art analytical techniques • A bridge between new research results, as published in journal articles, and a contextual literature review • A snapshot of a hot or emerging topic • An in-depth case study or clinical example • A presentation of core concepts that students must understand in order to make independent contributions SpringerBriefs in Operations Management showcase emerging theory, empirical research, and practical application in the various areas of operations management (OM), supply chain management (SCM), germane elements of Operations Research (optimization, stochastic modeling, inventory control, etc.) and all related areas of Decision Science and Analytics as applied to the practice of OM, from a global author community. Briefs are characterized by fast, global electronic dissemination, standard publishing contracts, standardized manuscript preparation and formatting guidelines, and expedited production schedules.
