## **Applied Environmental Science and Engineering for a Sustainable Future**

Series Editors: V. Jegatheesan, L. Shu, P. Lens, C. Chiemchaisri

Applied Environmental Science and Engineering for a Sustainable Future (AESE) series covers a variety of environmental issues and how they could be solved through innovations in science and engineering. Our societies thrive on the advancements in science and technology which pave the way for better standard of living. The adverse effect of such improvements is the deterioration of the environment. Thus, better catchment management in order to sustainably manage all types of resources (including water, minerals and others) is of paramount importance. Water and wastewater treatment and reuse, solid and hazardous waste management, industrial waste minimisation, soil restoration and agriculture as well as myriad of other topics needs better understanding and application. This book series aims at fulfilling such a task in coming years.

### **Recently published:**

E. Van Hullebusch, D. Huguenot, Y. Pechaud, M.-O. Simonnot, S. Colombano (Eds.)

#### **Environmental Soil Remediation and Rehabilitation**

Existing and Innovative Solutions

Z.A. Zakaria, C.N. Aguilar, R.D. Kusumaningtyas, B. Parameswaran (Eds.)

#### **Valorisation of Agro-industrial Residues – Volume II: Non-Biological Approaches**

Z.A. Zakaria, R. Boopathy, J.R. Dib (Eds.)

#### **Valorisation of Agro-industrial Residues – Volume I: Biological Approaches**
