Journal of the Knowledge Economy

Editor-in-Chief: E.G. Carayannis

- ▶ The first journal to focus on the social, technological and economic aspects of knowledge and innovation, combining theory/concepts and practice/application
- ▶ The journal will promote a global, multi-disciplinary approach that reflects the dynamic nature of knowledge and innovation, encouraging collaboration among authors from different disciplines
- ▶ Topical coverage across the spectrum of micro (firm-level), meso (industry-level), and macro (regional/national/international-level)

The Journal of the Knowledge Economy is the first journal to focus on the dynamics of the knowledge-based economy, with an emphasis on the role of knowledge creation, diffusion, and application across the spectrum of organizations, industries, nations, and regions. The journal incorporates insights from the fields of economics, management, law, sociology, anthropology, psychology, and political science to shed new light on the evolving role of knowledge and its economic implications. Articles emphasize empirical studies, underscoring a comparative approach, and, to a lesser extent, case studies and theoretical articles. The journal balances practice/application and theory/concepts.
