Socio-Affective Computing

Series Editors: A. Hussain, E. Cambria

Description

This exciting series publishes state-of-the-art research on socially intelligent, affective, and multimodal human-machine interaction and systems. It emphasizes the role of affect in social interactions and the humanistic side of affective computing by promoting publications at the crossroads between computer science, engineering and the human sciences (including biological, social, and cultural aspects of human life).

Three broad domains of social and affective computing will be covered by the book series: social computing; affective computing; and the interplay of these domains (for example, augmenting social interaction through affective computing).

Examples of the first domain include all types of social interactions that contribute to meaning, interest, and richness in our daily life, e.g., information produced by a group of people used to provide or enhance the functioning of a system. Examples of the second domain include computational and psychological models of emotions, bodily manifestations of affect (facial expressions, posture, behavior, physiology), and affective interfaces and applications, e.g., dialogue systems, games, and learning.

Research monographs, introductory- and advanced-level textbooks, and edited volumes are considered for the series.

Advisory Board

The advisory board of distinguished scientists with expertise in natural language processing, cognitive science, the social and cultural aspects of human life, and ethics. They assist the book series editors in the selection and evaluation of book proposals.

Mohamed Chetouani, Sorbonne Université, France Anna Esposito, Università di Napoli II, Italy Catherine Havasi, MIT Media Lab, USA Fabrício Benevenuto, Universidade Federal de Minas Gerais, Brazil Newton Howard, University of Oxford, UK Alexander Gelbukh, IPN, Mexico Jaewoo Kang, Korea University, South Korea Lorenzo Malandri, Università di Milano-Bicocca, Italy Yang Li, Nanyang Technological University, Singapore Viviana Patti, Università di Torino, Italy Paolo Rosso, Universitat Politècnica de València, Spain Rafal Rzepka, Hokkaido University, Japan Rui Xia, Nanjing University of Science and Technology, China Yunqing Xia, Microsoft Research, China Zhutian (Frank) Xing, Nanyang Technological University, Singapore Ruifeng Xu, Harbin Institute of Technology at Shenzhen, China
